SUMMARY

Frontend React Developer with 4 years of commercial experience building complex web applications. Driven by ownership - designing systems from scratch, proposing solutions, and improving what already exists rather than just closing tickets. Contributed ~50% of frontend functionality on a production EdTech platform used by thousands of users.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Libraries & Frameworks:** React, Next.js (v14/15), Redux, Context API
- **React:** React Hooks, Custom Hooks, SPA, React Hook Form
- **UI & Data Viz:** Material UI, Chart.js, Styled Components, Emotion, Tailwind CSS
- **API & Data:** GraphQL (Apollo), REST API, WebSockets (Mercure)
- **Performance:** Performance Optimization, Responsive Web Design
- **Tools & AI:** Git, Webpack, GitHub Copilot, ChatGPT, Figma
- **Collaboration:** ClickUp, Slack, Miro, Code Review
- **Methodologies:** Agile, Scrum, Kanban, Estimation

WORK EXPERIENCE

Frontend React Developer

"Digital Creative Cluster" | "Learning-Space Sp. z o.o." June 2022 - July 2026

- Grew from junior to mid-level over 4 years, taking ownership of full-page features, architectural decisions, and cross-cutting platform changes. **Contributed approximately 50% of the platform's** frontend functionality across a large-scale EdTech SPA.
- Designed a **reusable data table ecosystem** from scratch covering filtering, sorting, search, and infinite-scroll pagination with server-side query integration. Already replaced 4 legacy implementations platform - wide with 4+ more planned, becoming the internal standard for table development.
- Independently conceived and built a contextual **onboarding assistant** that monitors user progress at each platform stage and surfaces relevant hints and next steps. Logic designed from scratch; interaction history stored in localStorage to avoid redundant suggestions.
- Built interactive **analytics dashboards** featuring Chart.js visualizations, collapsible metric cards, and drag-and-drop widget reordering with filters backed by both frontend state and backend queries.
- Engineered a **content reuse system** allowing lessons, exams, events, and individual content elements to be shared across courses, cutting content creation time by 4x.
- **Optimized GraphQL queries** across key platform pages, significantly reducing the number of backend requests and improving page load performance.

- Built **subscription management and payment dashboards** including multi-step course and payment flow generators, used by all registered platform users across free and paid tiers.
- Implemented **auth redirect** flows so unauthenticated users return to their intended destination after login, including cross-space navigation.
- Built a **global error handler** that intercepts runtime errors, prevents platform crashes, and presents users with a contextual error dialog - reducing time to identify and fix issues.
- Configured custom **Webpack setup** and implemented frontend-side image storage, removing dependency on paid third-party asset services.
- Led progressive **JSX to TSX migration** across the codebase, improving type safety and long-term maintainability.
- Added support for **4 languages** (PL, EN, ES, IT) with a dynamic language switcher, using AI to accelerate translation workflows.
- Integrated WebSockets (Mercure) for **real-time user notifications** and live platform activity.
- Leveraged **GitHub Copilot and LLM tools** throughout development to automate boilerplate, accelerate refactoring, and handle routine tasks, improving personal development velocity by 20-30%.
- Conducted onboarding sessions for new developers, performed regular **code reviews**, and contributed to frontend architecture decisions. Active participant in Agile/Scrum ceremonies with task estimation in ClickUp.

Personal Projects: Actively develop personal projects using **Next.js 14/15 (App Router, Server Components)**, exploring **SSR, SEO optimization**, and modern React patterns - including apps with **AI integration**. Code available on [GitHub](#) and [portfolio website](#).

LANGUAGES

- **Polish:** (C1)
- **English:** (B2)
- **Ukrainian:** (Native)
- **Russian:** (C2)

EDUCATION

- **IT School "GoIT":** Full Stack Developer (JS, React, Node.js)
- **Policealna Szkoła Zawodowa "Eduatut":** IT Specialist
- **European University:** Finance
